

CHAIRPERSON'S MESSAGE

We see children as the builders of newer INDIA in the emerging world. That is why we have envisioned an edifying system, which amalgamates the aspirations of the present generation without compromising on the Indian value system and traditions. It is our consistent endeavor to shape our children to become successful global citizens. Students, you are about to cross a bridge in your life because school education is a turning point itself. It is in your hands to make sure that bridge leads you towards success. The hard work of today is the triumph of the future. The time and effort you spend today are the deciding factors of your later years. As the chairperson of this institution, I anticipate the full participation and cooperation of the teachers to transform those dreams to reality.

ALL THE BEST!

PRESIDENT'S VIEW

A person's knowledge is unique to him. Our system of education has to appreciate this diversity. The assumption that the more information one can cram into one's head, the more knowledge is acquired, stands no ground today. If we have to become a knowledge driven society, we will have to generate and apply knowledge profusely in a productive manner. There has to be encouragement given to innovation, quality and creativity in education. The role of education and the institutions has to drastically change from that of a "doer" of running the institutes to "being" a facilitator of diversity and innovation. " I am certain this temple of learning will help the students to grow mentally alert and physically sound to lead their country with distinction.
